

ASTEC MINING ANNOUNCES PARTNERSHIP WITH WILEY X EYEWEAR

*Wiley X protective eyewear to be on display; given away at
Astec Mining exhibit during MINExpo 2012*

MEQUON, Wisconsin, USA – September 13, 2012 – Astec Mining, a leader in global processing solutions, has partnered with Wiley X Eyewear to promote safety in the mining industry.

Astec Mining's partnership with Wiley X will debut at MINExpo, September 24 – 26, 2012 at the Las Vegas Convention Center. Held every four years, MINExpo is the premier exposition of mining equipment and services in the world. Staff working Astec Mining's 85' x 45' interactive outdoor exhibit will be wearing Wiley X sunglasses and there will be daily giveaways of select styles of Wiley X protective eyewear.

For more than two decades, Wiley X has been a family owned and operated organization and a global leader on the forefront of optical technology. Their comprehensive line of protective eyewear is based on the company's proven High Velocity Protection (HVP™) technology and is designed to protect workers performing a variety of jobs. Wiley X is the only premium performance sunglass brand whose entire line meets the stringent ANSI Z87.1-2003 High Velocity and High Mass Impact Safety standards, providing all wearers with proven OSHA-grade protection.

According to a recent report from the U.S. Bureau of Labor Statistics, there were 25,230 reported eye injuries in one year alone that required time away from work. The non-profit organization Prevent Blindness America reports that 90 percent of all eye injuries can be prevented through the use of proper eye protection. Astec Mining, through this important partnership with Wiley X Eyewear, hopes to promote the importance of OSHA-grade eyewear protection in the mining industry.
